Final Release

User Story

story points

Estimated: 5

As a

user

I want

to see on which streaming provider the content is available

so that

I know where to watch it immediately

Additional detail:

- Integration of another API (e.g. JustWatch)
- Display availability of streaming provider (Netflix, Disney+, ...)

Acceptance Criteria:

- user sees streaming availability
- at least one provider per content
- not available → clear feedback
- data loading without error

User Story

story points

Estimated: 5

As a

new user

I want

to create an account

so that

I can save my watch history
